Hebron Project

Issue 8 - Winter 2015

Hebron Employees Care!

Employees of Hebron Project contractors at Bull Arm have proven again that they care! Our third annual Elf Challenge raised over \$8,000 in employee donations to help local families this past Christmas. The Salvation Army chapters in Clarenville, Arnold's Cove and Chance Cove, and the Regional Action Committee on Housing ensured the funds reached those in need in our communities.

Presentation of Elf Challenge donations to community partners.

Back row (l-r): Peter Velez, EMCP GBS Site Manager; Mike Davis, Union Coordinator; Mark Kerrivan, IW Local 764; Roland Smith, Carpenters Local 579; Victor Richards, BAC Local 1; Jenny Hickey, OE Local 904; Scott Butt, Carpenters Local 579.

Front row (l-r): Camille Rose, Community Relations; Major Fudge, Salvation Army Chance Cove; Captain LeDrew, Salvation Army Clarenville; Colin Holloway, REACH.

(Missing from photo Salvation Army Arnold's Cove representative).

Junior Achievement

In January, Roxane Wareham, Community Relations Advisor for ExxonMobil Canada Properties (EMCP), helped deliver Junior Achievement's Economics for Success Program to the Grade 9 students at Tricentia Academy in Arnold's Cove. Junior Achievement is a non-profit organization dedicated to inspiring and preparing youth to succeed in a global economy. They achieve this by offering various business education programs to young people. The Economics for Success Program challenges the students to think about their goals, values and skills. The students work through a monthly budget and participate in mock interviews. The program helps them build a resume and start thinking about education and employment options after high school.

Habitat for Humanity

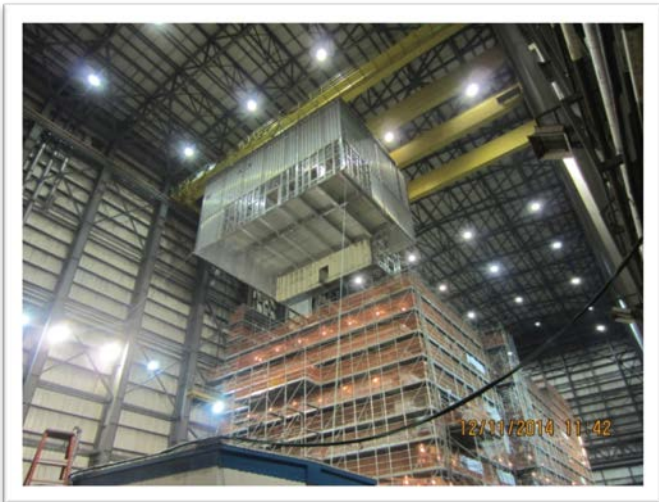

Last fall, the Hebron Project donated hard hats and work gloves to the Clarenville chapter of Habitat for Humanity to help support their local building initiative. In January, the EMCP site team volunteered for half a day at the Habitat for Humanity build site as part of a team building exercise. It was a fun and rewarding afternoon!

A view down the centre shaft of the Gravity Based Structure where mechanical outfitting will continue for the next several months.

A curious onlooker paused in its daily travels to check out the activities at the deep water site.

A fabricated block being lifted onto the living quarters.

A south view of the integration pier at Bull Arm.

Contact Us

The Hebron Information Centre is located at the TCH entrance to the Bull Arm Site (Nalcor Building). Community Relations staff are generally available Monday-Friday during regular business hours.
